

INTERCONNECT LEADS - ULTRA+ SERIES

ULTRA+

This Series of quality Audio Video Leads for home theatre and audio enthusiasts is ideal for the consumer who demands the best from their Audio Video devices.

Like the ULTRA Series, the ULTRA+ is also packed in a high quality, durable and transparent heat sealed blister pack with the a Tear-Open feature. The ULTRA+ Series is easily identifiable not only through name, but also through a different colour coded packaging. Each pack is clearly marked, with an easy to understand connection guide on the back of every pack.

- Silver Plated Copper (SPC) for the centre conductor and braiding. This Series of AV leads offers the highest thermal and electrical conductivity as well as good oxidation and corrosive resistance compared to all other metals
- These quality SPC cables have the characteristics of higher conductivity, less electrical resistance, better signal transmission, therefore resulting in lower loss.
- Foam PE dielectric with a 75 Ω characteristic impedance as the insulation ensures the image quality is transmitted with high stability and fidelity.
- With SPC + Aluminium Foil (Conductive PVC), this shielding minimizes circuit interference, achieving a higher signal to noise ratio.
- Professional soft, highly flexible and durable black PVC outer jacket provides protection against twisting or bending.
- Elegant pearl connectors are 24 K gold plated to provide The Ultimate Connection.

VL-BHU1R/1R
ULTRA+ Series - Blister Pack
 Single RCA to Single RCA
 Video or Sub Woofer Lead
 1.5mtr

VL-BHU1R/2R
ULTRA+ Series - Blister Pack
 Single RCA to 2 x RCA
 Mono to Stereo Audio Lead
